

Event Report

Event Name: Construction Site Excursion

Date of the Event: 25th August, 2023

Duration of the Event: Whole day

Venue: Construction Site near Academic Block, Sandip University, Sijoul

Name of the Event Coordinator-Prof. Md Faiyaz Alam

Introduction:

On 25th August students of Civil Engineering from Sandip University embarked on an insightful and educational excursion to a construction site located at the university's Sijoul campus in Madhubani. The aim of the excursion was to provide students with practical exposure to real-world construction practices and to deepen their understanding of the theories learned in the classroom.

Schedule and Activities:

Morning Session:

The event commenced at [Insert Time] with a brief introduction by [Faculty/Coordinator Name], who outlined the objectives of the excursion. Safety guidelines and precautions were also emphasized, ensuring that all participants were well-informed about the do's and don'ts at the construction site.

The morning session involved a guided tour of the construction site. Students were able to witness various stages of construction, from excavation and foundation laying to structural framework assembly. Experienced site engineers provided explanations about the different materials used, the sequencing of tasks, and the coordination required to execute a construction project successfully.

Afternoon Session:

The afternoon session delved deeper into specific aspects of construction. Workshops and demonstrations were organized to showcase the operation of heavy machinery, the intricacies of concrete mixing and pouring, and the importance of quality control in construction projects. Students actively participated in these activities, gaining hands-on experience under the guidance of skilled professionals.

Key Takeaways:

Practical Application: Students observed the practical application of theoretical knowledge acquired in their academic courses. They witnessed how engineering principles are translated into real-world construction practices.

Safety Awareness:

Emphasis was placed on safety protocols and personal protective equipment. Students gained an understanding of the importance of adhering to safety measures at construction sites.

Teamwork and Coordination:

The excursion highlighted the significance of teamwork and effective communication among various stakeholders, including engineers, architects, and laborers, for the successful execution of a construction project.

Conclusion:

The Construction Site Excursion at Sandip University's Sijoul campus was a resounding success, offering students a unique opportunity to bridge the gap between classroom learning and real-world application. The event not only enriched their understanding of construction practices but also ignited their passion for the field. Such excursions play a crucial role in shaping well-rounded and industry-ready professionals.
