PPT Presentation by Program Chair **Prof. Sweta Dubey**

Technical Session:2

PPT Presentation by **Prof. Neha Chandra.**

Round- II

- Discussion on career Option .
- Students plan to achieve the goal related to career.

About the Program:

Seminar Overview: Decoding the Dynamics of Interview Analysis

In our organised programmes, interviews are typically dissected solely based on the content of the conversation. However, this conventional approach tends to attribute each statement to individual speakers, overlooking the dynamic and collaborative nature of a conversation. This seminar aims to shift this perspective, exploring interviews as dynamic events rather than isolated content.

Understanding the Interactional Constitution: We challenge the notion that interviews can be understood solely by analysing individual statements. Instead, we emphasise the interactional constitution of interviews, viewing them as processes shaped collaboratively by participants. The content emerges from interactions, creating a situation where participants provide each other with the resources needed to navigate the unfolding conversation.

Irreducibility in Participants and Time. The nature of interviews is irreducible, concerning both participants and time. Individual lines cannot be cleanly attributed to specific individuals, highlighting the collaborative effort in the conversation. Similarly, the temporal aspect is crucial, as participants may not foresee the conversation's trajectory, leading to an evolving understanding throughout.

Event Objectives:

1. Career/Major Exploration Assessment and Learning Outcomes:

- **Goal:** Assist students in choosing majors and career paths during their early years at Lehman College.
- **Objective:** Students will gain a clearer understanding of the career exploration process and align their skills and interests with a chosen major or career path.
- **Learning Outcome:** After participating in 'The Right Major for You Workshop,' students will list at least one major or career path for further exploration and declare a major.
- **CAS Domain:** Knowledge Acquisition, Construction, Integration, and Application.

2. Gaining Experience Assessment and Learning Outcomes:

- **Goal:** Help students seek opportunities for experiential learning within their chosen career fields.
- **Objective:** Increase student participation in experiential learning by 10% annually for the next three academic years.
- **Learning Outcome:** Graduating students will have engaged in career-related experiences while at Lehman College.
- **CAS Domain:** Practical Competence; Intrapersonal Development; Interpersonal Competence.

This event not only broadens our understanding of interview dynamics but also provides practical guidance for students navigating career exploration and experiential learning.

The DAY 14TH October 2023

Conclusion:

A Talk Show on career Option is a process that focuses on matching individuals' interests, strengths, and ambitions with the job. Finally, the Program is successfully done by the Prof.Sweta Dubey and Prof.Neha Chandra on 14th October 2023 at 1 pm to 3 pm. Student have actively participated in it and share their idea related to career development.
